Annual Impact Report
FY 21-22
The 2021-22 academic year has been a year of change and growth for the Apex Center for Entrepreneurs at Virginia Tech. We continue to believe entrepreneurship, creativity, and innovation are vital elements of higher education in the dynamic and ever-changing environment of the 21st century. The entrepreneurial mindset equips students to thrive in a dynamic global environment that requires courage, agility, resilience, and critical-thinking, always ready to pivot and respond to emerging problems and opportunities.

At the Apex Center for Entrepreneurs, we act as the student “lab” for entrepreneurship at Virginia Tech. We believe practicing entrepreneurship provides vivid evidence of how students’ classroom learning can be applied to real-world experiences with impact that elevates both their own success and the wellbeing of others. Our students are provided an experiential education which blends classroom learning and practical experience that positions students for a purpose-driven career and life. Experiential learning extends students’ traditional classroom learning to tackle authentic problems and work in context.

At Virginia Tech, our ecosystem is robust with organizations helping students live, learn, research, and practice entrepreneurship. VT has quickly risen to become globally recognized for entrepreneurship through the amazing efforts of the Innovate Living Learning Community, Link+License+Launch, the Innovation Campus, key partners in the Pamplin College of Business, talented faculty across campus, and many more partners at VT and in our region.

(Continued on Page 3)
Thanks to an outpouring of support and engagement from our students, faculty and alumni, we have many accomplishments from this past year to celebrate. Here are a few highlights:

- Virginia Tech was ranked #25 undergraduate entrepreneurship program nationally in Princeton Review and Entrepreneur Magazine for the second consecutive year and #4 in the Southeast region.
- Virginia Tech was recognized with the “Excellence in Entrepreneurship Education Model Program Award” from the United States Association for Small Businesses and Entrepreneurship (USASBE).
- The Apex Center opened a new physical space in downtown Blacksburg where students have the opportunity to cowork and engage with new resources and programs.

While substantial work lies ahead, we are committed to fostering a world-class, inclusive, environment that unleashes creativity, cultivates vision, and teaches the governing principles that are the foundation of every successful enterprise. Let’s keep building together!

Derick Maggard  
Executive Director

Sean Collins  
Managing Director
Our Mission:
The Apex Center for Entrepreneurs inspires and empowers students to turn their passion, purpose, and ideas into action.

Our portfolio of programs is inter-disciplinary and provides any Hokie, from any major and any year the opportunity to engage in all phases of the entrepreneurship and innovation process, and encourages alumni to interface with the next generations of entrepreneurs.

Our Vision:
Our vision is to be a leader and destination of choice for students, faculty, and alumni who drive positive change through innovation and entrepreneurship.
Virginia Tech has been ranked **No. 25 for undergraduate entrepreneurship programs** by Princeton Review for the second year in a row in 2022. Virginia Tech was also ranked **#4 in the Southeast region** and was the **only school in Virginia** to make the Princeton Review and Entrepreneur Magazine Top 50. This confirms what students at Virginia Tech already know: 

**THIS IS HOME FOR STARTUPS**

Virginia Tech received the Model Program Award from the United States Association for Small Business and Entrepreneurship (USASBE) during the 2022 USASBE Excellence in Entrepreneurship Education Awards held on Jan. 8. The award recognizes bold and innovative programs making an impact in the field of entrepreneurship education with comprehensive, high-quality educational programs that successfully train future generations of entrepreneurs.

APEX CENTER SPACE

In September of 2021, the Apex Center opened the doors to its physical space, conveniently located in downtown Blacksburg at 432 North Main Street Suite 200.

The center includes coworking space where student entrepreneurs can meet with team members to work on their venture or study between classes.

The programming space holds Apex Center events like workshops and demos, as well as events for partner registered student organizations.

Our Entrepreneur in Residence suite is available for our advisory board members and industry sponsors to host office hours for student entrepreneurs.
We offer programs that enable any student from any major to get involved in the entrepreneurial process during any year of their time at Virginia Tech.

apexvt.edu/programs

The Startup Hokies Community & Incubator programs are designed to meet students wherever they are in their entrepreneurship journey and are the “front door” for all Apex Center programs and resources.

Benefits of the Startup Hokies programs include:

- A collaborative environment (dedicated space) where students can meet other students passionate about practicing entrepreneurship
- Expertise from student consultants and faculty to help validate their business hypothesis and move their concepts forward
- Access to funding $ to explore possible customer segments, identify early adopters and test potential solutions
In the fall 2021 semester, the Apex Center introduced student-consultants. Student-consultants are students majoring in fields including marketing, finance and business information technology who are available to Apex student-entrepreneurs for office hours. Student-consultants also assist in programming by leading weekly workshop and pitch sessions.

Shannon Kelly
Senior
Marketing consultant

Jacquelyn Young
Senior
Business information technology consultant

Jonathan Kebede
Sophomore
Finance consultant

Ben Butler
Junior
Marketing consultant

For me, having access to the consultants has been the best part of joining the incubator program. They’re your peers, but they have a completely different background than I do, so they help me look at the problems my business is facing from a different angle. And we’ve been able to come up with some great solutions.

-Will Wright, UnVeil

I know I can always come to the consultants for office hours, but I also love that they lead workshops. It’s been so helpful to have in-depth sessions where they can teach us about something like marketing research that will actually help me to grow my business.

-Caitlin Phillips, Gratitude
In the fall 2021 semester, the Apex Center introduced a new digital platform to centralize resources for student entrepreneurs. Join our Community of more than 400+ active users at vt.startuptree.co

View upcoming events and applications

Connect with mentors and schedule office hours

View open positions on venture teams

See what other students are building
**Program Highlights**

**VB Workshops**
Hands-on, minds-on, workshops covering topics such as business models, market discovery, and team building.

**KickStart VT**
Campus-wide seed funding program for student startups to identify milestones and get feedback from experienced entrepreneurs.

**Hours with Experts**
Hours with Experts connects student entrepreneurs with peer (student) consultants as well as industry professionals to provide mentorship and one-on-one feedback.

**Startup Weekends**
Startup Weekend events at the beginning of each semester bring together students from across Virginia Tech in a high energy environment that fosters concept development and team formation.

**Venture Founders**
Venture Founders receive $ resources to match their passion. Our founders are funded to travel to external competitions and/or are placed in world-class programs to rapidly move their new ventures forward.

**Ignite Fridays**
Ignite sessions give students an opportunity to plug into the entrepreneurship ecosystem at Virginia Tech and provides a platform for students to discuss their concepts in a supportive peer-to-peer environment.
Having the opportunity to help young entrepreneurs and guide them in the early stages of starting a business has been so rewarding. These students are bright and talented. They just need advice and guidance from someone who has already walked that path. It’s been amazing to see students like Naman and Sana grow MassApply over the last few years.  

-Kim Shanahan, Apex Center Mentor & Advisory Board Vice Chair

I have worked very closely with Emerson Dove and Brandon Fan on their venture Blankly Finance, and it has been so fun to see it go from a very early stage project to the growing business it is now. These students are the future of entrepreneurship. They are going to do amazing things and we get a front row seat.

-Adam Rossi, Mentor and Apex Center Advisory Board member

I can say that we have some of the most innovative pre-Series A businesses and passionate founders in the country. This past semester I worked with job search automation firm, MassApply. It was a privilege to work alongside Naman and Sana to strategize on various revenue models for the business. I found the experience to be as gratifying for the mentor (me), as it was for the entrepreneurs.

Rob Cummings, Mentor & Apex Center Advisory Board member

When we first joined Apex, Kim Shanahan was a great mentor for us. She has so many connections that would have been impossible for us to connect with as just two college students with an idea. And as we’ve made more progress with MassApply, Rob Cummings has been a great mentor too. I think just having someone who is so willing to offer advice and take the time to help is so big for us.

Naman Singh, MassApply

Within just a couple weeks of getting connected to Apex, I was already working with Nelson Chu and Rob Cummings. Having their mentorship and getting their advice is different than anyone else I could ask for help because they’ve been in my shoes. They have the experience of starting a business and they’ve seen all the challenges I’m seeing now.

Naman Singh and Sana Ahmad from Economics Sciences are team MassApply. MassApply is a management tool that helps students apply to internships and full time jobs. They provide students with top companies, verified recruiter emails, and direct links to applications, recruiter lists, and interview reviews! Students can update their status and write personal notes to track their progress. Representing the College of Science.

MassApply traveled to Florida State University in Tallahassee where the team competed in the ACC InVenture Prize Competition in April of 2022.

Emerson Dove and Brandon Fan are team Blankly. Blankly is building a platform to enable anyone to build hedge fund level trading algorithms & connect to the cloud with just a few lines of code. Representing the College of Science.

Blankly competed and won the top prize at the Global Student Entrepreneur Awards (GSEA) Southwest Virginia Regional Competition, then traveled to Chicago to compete in the GSEA National Finals in March. Blankly also competed in the Tulane Business Model Competition in April.
Sai Gurrapu is Tandemly. Tandemly is a tool that allows users to leverage advances in augmented reality and machine learning to provide a suite of educational tools for the learning disabled. Representing the College of Science.

Tandemly traveled to Minneapolis in April where the team competed in the eFest Schultz Entrepreneurship Challenge and made it to the final round of competition.

Sonia Warrior is team WISE Cities. WISE Cities, LLC (wisecities.us) is an all female, student-run technology startup dedicated to providing convenient solutions for senior communities to stay connected. We are involved in a year-long pilot project with the City of Fairfax. We are currently developing an accessible mobile app to help seniors connect with each other, find local group activities and clubs, and easily find support systems within their local community to help prevent individual isolation and encourage healthy community engagement.

Wise Cities was selected for Semi-Finals for the Smith Draper women’s startup competition.

https://www.apex.vt.edu/about/our-advisory-board/
As advisory board members for the Apex Center for Entrepreneurship, our primary role is to be guides and advisors for the Apex Center leadership, as well as for the students in Apex Center programs.

In the past year, we have seen great wins for the Apex Center, like opening a physical space for students to work with their team members and attend programs to help them grow their venture. Growth for the Apex Center means more opportunities to achieve the mission of the center - to help any student from any major to turn their ideas and passions into action.

In the next chapter at the Apex Center, we have an amazing opportunity to build on a strong foundation and continue to be the lab for entrepreneurship at Virginia Tech. It is truly an exciting time at the Apex Center and we look forward to getting as many people involved who are passionate about impacting students’ lives through entrepreneurship.

Go Hokies!

John Kinzer
